At the NRC EIS meeting in Eunice on 10-14-04 Jim Furland, President of LES, said that LES is 75.5% owned by URENCO which is a foreign corporation owned by England, France, and Germany. It is a grave threat to American national security to allow the LES National Enrichment Facility to be owned by foreigners for many reasons. I am requesting that the NRC refuse to issue an operating license to LES unless at least 51% of LES is owned by the American people. I have previously submitted an alternative ownership plan to the NRC for an American owned uranium enrichment facility in Lea County in which the people of Lea County would own 51% of that facility. I hereby request that the NRC include my previous proposal, and the socioeconomic benefits of that proposal in the NRC EIS.
